DUEPERTHAL member of Lab 2020 joint research project

Lab|2020

As a pioneer of innovative ideas, it is only logical that since 2009 DUEPERTHAL has officially been an active participant in the »Lab 2020« joint research project.

The »Lab 2020« joint research project is an innovation project in the environment of pharmaceutical and biotechnological laboratory work.

In it, practical, sustainable and innovative solutions for laboratory work and design are developed. The laboratory working environment is examined in the project, in particular under process, architectural and fitout and information technology aspect.

The exchange of experience between manufactures, planners and users and the associated focussing of their extensive expertise enables new ideas to be implemented, practically, cost-effectively and with an eye to the future.

Fraunhofer Institut
Arbeitswirtschaft und
Organisation

With the foundation of EGNATON (Registered European Association for Sustainable Laboratory Technology) professionals in the laboratory sector are partnering in single platform.

As a founding member DUEPERTHAL participates in the international exchange of ideas and supports EGNATON, to generate a pan-European network of laboratory experts to deal with the subject of „sustainable laboratory technologies“.

Labs 21[®]

The international exchange of information, especially between Europe and USA, is becoming increasingly importance. Therefore Lab 2020 is also an official supporter of Labs21[®] - a "green lab" program for the optimisation of sustainability in the design, construction and operation of laboratories.
